2006-07 ESTIMATES PRESENTATION

INTRODUCTION

The 2006-07 Estimates represent the financial plan of the Province presented by the Government to the House of Assembly for the fiscal year commencing April 1, 2006. It outlines the estimated expenditures and revenues for the year and reflects policies, programs and priorities of Government in the form prescribed by Treasury Board. For comparative purposes, a revised forecast for the previous fiscal year is presented as well as the previous year's budgeted figures, restated where appropriate, to reflect departmental restructuring.

Government also presents additional information on consolidated accrual revenues and expenses, and information on the consolidated change in net debt and accumulated deficit. Other Statements, Exhibits, and Appendices continue to be presented in accordance with the modified cash basis of accounting as described in the following sections.

PROGRAM STRUCTURE

The program structure of the Estimates represents the manner in which Government divides the financial plan into areas of responsibility and accountability. The Estimates are classified into the following groups:

Sector - A Sector constitutes a division of the Estimates into broad areas to which funding is provided, that is, General Government, Resource and Social.

Department - A Department represents a major policy area to which funding is provided. Each Department is headed by a Minister who is accountable and responsible for its operations (for example - Justice).

Program - Programs are major groupings of the significant functions and responsibilities performed or delivered by a Department (for example - Public Protection).

Sub-program - Sub-programs are divisions of each program which further define areas of responsibility and accountability for program delivery purposes (for example - Police Protection).

Activity - Activities represent the lowest division of the Program Estimates and constitute a specific service or function being funded (for example - Royal Newfoundland Constabulary). Activities are the level at which the House of Assembly votes funding and are the level used for appropriation control.

EXPENDITURES

Budgetary

Budgetary expenditures are those incurred by Government in the course of achieving its policy and program objectives. Expenditures are provided on a gross basis with related revenues received not being netted against the expenditure. The categories of expenditures are:

Current Account - In addition to expenditures of a housekeeping nature such as salaries, supplies, rentals, and interest; current account also includes operating grants for various programs and organizations such as hospitals, schools and Crown Agencies.

Capital Account - These are expenditures whose benefits normally extend over more than one fiscal year. The types of expenditures included would be construction projects, loans, investments in infrastructure and major equipment purchases.

EXPENDITURES (Cont'd)

Statutory - Expenditures in this category are specifically authorized by Acts of the Legislature. These payments, such as debt expenses, are made under the Authority of the relevant Acts and do not require annual authorization by the Legislature. Such expenditures can fall under the category of either current account or capital account.

Non-Statutory - These are expenditures which require an annually authorized appropriation of the Legislature prior to the expense being incurred. This authorization is secured when the Legislature votes on the various expenditures during debate of the Estimates.

Non-Budgetary

Non-budgetary transactions relate primarily to debt redemption and sinking fund payments. Such expenditures are for the repayment of debt previously incurred and the setting aside of funds for the future repayment of debt.

Classification of Expenditures

Budgetary expenditures are classified into main objects by type of goods or services. The standard main objects used are as follows:

- | | |
|---------------------------------------|---|
| 01. Salaries | 07. Property, Furnishings and Equipment |
| 02. Employee Benefits | 08. Loans, Advances and Investments |
| 03. Transportation and Communications | 09. Allowances and Assistance |
| 04. Supplies | 10. Grants and Subsidies |
| 05. Professional Services | 11. Debt Expenses |
| 06. Purchased Services | |

REVENUES

Classification of Revenues

Revenues are classified into two distinct categories, current revenues and related revenues, both of which include revenues from Provincial and Federal sources.

Current Revenues - This category includes Provincially generated sources such as taxation and fees. The Federal sources include such revenues as Health and Social Transfers, Equalization, and other transfers. Current Revenues are not displayed in the detailed Departmental Estimates.

Related Revenues - This category includes revenues which are a direct result of current and capital expenditures incurred. The Provincial sources include revenues such as interest receipts and sales and services by Government-operated facilities. The Federal sources are mainly the result of cost-sharing agreements between the Province and the Government of Canada, whereby the Province delivers the programs and receives reimbursement from the Government of Canada.

ACCOUNTING PERIOD

In accordance with the Financial Administration Act, Government follows a modified cash system to budget for expenditures and revenues. Expenditures are charged against a budget appropriation in the fiscal year in which payments are made, with exceptions for payments made in April for goods or services received prior to March 31, which are charged back to the previous fiscal year. In the case of Federal revenues, receipts received up to the end of April can be written back to the previous year if they relate to expenditures of that fiscal year.

CROWN AGENCIES

Government has established a number of Crown Agencies and Corporations to help carry out its programs and services to the public. Other than the active operating Agencies referred to below, Government does not have any significant special fund accounts except the Province of Newfoundland and Labrador Pooled Pension Fund, the Labrador Transportation Initiative Fund and the Newfoundland Government Sinking Funds.

ESTIMATE OF TAX EXPENDITURES

The principal function of the tax system is to raise the revenues necessary to fund government expenditures in a manner that is both efficient and equitable. The tax system is also an instrument of policy that serves to advance a wide range of economic, social and other public policy objectives. Tax measures that reflect such objectives include exemptions, deductions, rebates, deferrals and credits, and are typically referred to as “tax expenditures”. Tax expenditures can be viewed as substitutes for direct program spending.

The public sector debt includes the funded debt of Government, debt of its Crown corporations and agencies, guaranteed debt, and debt incurred by municipalities. The only financial asset deducted is the face value of sinking funds held for the retirement of debt. The total public sector debt does not include payables and accruals, or unfunded liabilities related to pensions, severance or post-retirement benefits.

(ii) For 2006, U.S. dollar debt is converted to the Canadian dollar equivalent using the exchange rate of 1.1650.

(iii) Includes guaranteed debt, net of related sinking funds, in the amounts of \$1,534.5 million, \$1,697.4 million, \$1,985.6 million, \$1,758.0 million and \$1,664.5 million at March 31, 2002 to 2006, respectively.
